FIRSTLY KNOW ABOUT US

Hello! Come to know about us!

Better Communication,Better Cooperation!

If you take a look at our logo,you will find that it is composed of two abstract shapes interacting with each other. It means cooperation as well as two strength: Manufacture and Innovation. Just like the meaning of our logo,we hope we can better cooperate with our customers and can step into a better platform together.

We are a leading manufacturer of die casting,especially in the field of pneumatic and automotive. Above 90% of the production procedures are done by ourselves,which makes us different from the other suppliers. With more than 17 years of OEM experiences, we play a leading role in this area. Our production capacity, comprehensive services as well as abundant experience enable us to be your best choice.

Corporate Data

Founded	2017
Registered Capital	60M RMB
Annual Sales	1.3B-1.5B RMB
No.Employees	250-300 People
Location	Pinghu Zhejiang

We are Shanghai Bangye Pneumatic And Hydraulic Components Co.,Ltd which has established since 2002. Our company moved from Shanghai to Pinghu in December 2020.

Our Certifications

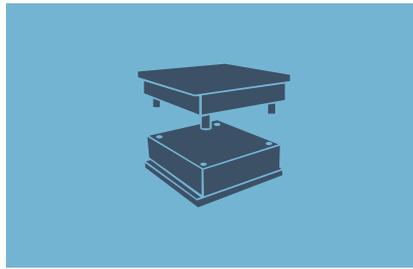

WE ONLY DO HIGH QUALITY ITEMS

Through more than 18 years of experience, we have learned that only by continuous improving our services can we increase our reputation among customers.

SECONDLY OUR SERVICES FOR YOU

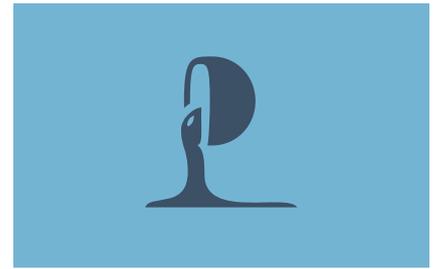

We mainly can provide OEM services for our customers according to their specific requirements.

At Bangye we pride ourselves on being an industry superior supplier of die casting and injection mold, high integrity aluminum and zinc alloy die casting and precision machined components. Besides, in order to better understand the products, we also have self-owned pneumatic products such as cylinders, valves and FRL to satisfy customers' demands.

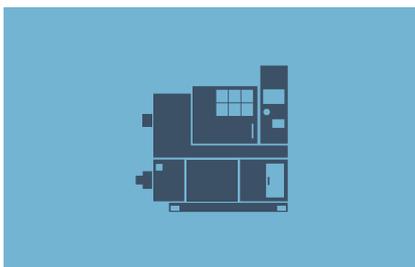

MOLD MAKING

Being able to design and produce aluminum and zinc alloy die casting mold, plastic injection mold and gravity casting mold.

DIE CASTING

Owning 13 sets of high pressure cold chamber die casting machines and 2 low pressure casting machines. All the die casting machines are with automatic feeders, spraying systems, fetch robot arms. The alloy can be aluminum or zinc.

CNC MACHINING

OEM CNC Machining. Secondary machining such as tapping, milling, boring, turning, drilling and threading are performed according to your specifications.

PNEUMATIC ASSEMBLING

We could supply the pneumatic cylinders, pneumatic actuators, pneumatic press machines and also other pneumatic accessories.

SURFACE TREATMENT

Cleaning, Impregnation, Shot Blasting, Anodization, Cathaphoresis, Coating, Surface Painting

QUALITY ASSURANCE

Everything we carry out is according to our ISO 9001:2015 quality management system. We take quality control at every stage as our top priority. We pay attention to the management of the product process so as to make our products conform to customers' requirements. We satisfy customers' expectation by improving continuously. Besides, we are currently striving for the requirements of IATF16949 quality system.

Quality Lab Equipments & Capabilities:

Coordinated Measuring Machine (Leader NC658)

Contour Measurement Contracer (Mitutoyo C3200)

X-Ray Diffraction and Elemental Analysis (Bruker Q2

ION)

Tensile Testing (Testing products to evaluate the material tensile strength)

Gas Porosity Testing

Facts:

The staff of quality department occupies 10-15%

of all the staff.

IQC(Incoming quality control) for raw materials.

IPQC(Inprocess quality control) during normal production.

OQC(Outgoing quality control) before delivery.

WHY CHOOSE US

PRODUCTION CAPACITY

Producing more than 3000 types of products every year. No matter whether it is small, highly customized lots or large lots, we can always response quickly.

REASONABLE PRICE

We own mold, die casting, CNC & NC machining, assembling and the surface treatment workshops by ourselves, thus the price is more competitive.

CREDIBILITY

We have already been accepted by many customers who play a leading role in the pneumatic industry.

GOOD QUALITY

We strictly follow the rules of ISO 9001-2015 system to guarantee the quality.

INNOVATION

We can not only develop new products but also improve the production technology to save costs

EXPERIENCED

We stand in the pneumatic field for more than 18 years and 9 years for automotive field.

We have the best solution for you. More than 18 years of experience.

CASE GALLERY

Products are picked here to better show our capability. Our company is aimed at offering an all in one service to our customers when we find that it is hard to monitor the quality from various suppliers.

Our workshops are run separately, while it connects with each other closely to make the working process smooth.

01

01. In house mold designing and manufacturing.

We are able to design and manufacture the aluminum & zinc die casting mold, gravity casting mold as well as plastic injection mold for our customers. Mold analyzing services are also available before making the mold. Equipments such as CNC Machining center, WEDM, Electropulsing and mold clamping machines are also set up in our factory.

04 Pneumatic Assembling

We could supply the pneumatic cylinders, pneumatic actuators, pneumatic press machines and also other pneumatic accessories.

Equipments for valve and

cylinder testing, pad printing are also available in our factory.

Equipments for cylinders and actuators testing, pad printing are also available in our factory.

04

02. Aluminum & Zinc die casting parts for various industry.

We are able to die cast various parts for our customers such as automotive pumps, VVT valve sleeve, valves bodies, regulators bodies, cylinder covers, carburetors and etc., for our customers. Meanwhile, our main customers are from various kinds of markets such as Pneumatic, Automotive, Healthcare, Electronic, Printing, Aerospace and etc.,

03. CNC & NC Machining for aluminum alloy die cast parts, brass, stainless steel, steel and etc.,

Our CNC workshops are able to machine materials such as brass, aluminum alloy, carbon steel, stainless steel and plastics.

The range of machining diameter is 1-400 mm.

There are 25 Tsugami machining equipments and more than 60 sets of CNC machining centers, which can satisfy your demands.

Out sourcing surface treatments such as passivation, nickel-plated, gold-plated, tin-plated, galvanized plated and Anodizing and etc., are also available.

We are able to die cast the parts no matter whether the die casting parts should conform to EXTERIOR or AIR TIGHTNESS requirements.
